## **Limetree Bay Continues to Work with Government to Identify Odor**

**ST. CROIX, U.S. Virgin Islands (May 9, 2021)** – Limetree Bay Refining, LLC (“Limetree Bay” or the “Company”) continues to work with local and federal regulators to determine the source of recent odors affecting areas in the western part of St. Croix.

In response to community concerns and to support efforts by the U.S. Virgin Islands Government to identify the source of recent odor complaints, industrial hygiene specialists at Limetree Bay conducted air monitoring beginning Friday and continuing through Saturday evening at five locations immediately to the West and Northwest of the refinery. This air monitoring detected zero concentration of hydrogen sulfide, zero concentration of sulfur dioxide and zero concentration of hydrocarbons. The results of this monitoring have been shared with the Department of Planning and Natural Resources (DPNR).

Limetree Bay remains committed to cooperating fully with the local and federal government to identify the source of the odor and will work to immediately address any findings identified from the odor investigation that are attributable to the refinery.

For more information or to report an issue, please contact the Limetree Bay Command Center at (340) 692-3000.

### **About Limetree Bay Refining**

Limetree Bay Refining, LLC, restarted operations in February 2021, and is capable of processing around 200,000 barrels per day. Key restart work at the site began in 2018, including the 62,000 barrels per day modern, delayed Coker unit, extensive desulfurization capacity, and a reformer unit to produce clean, low-sulfur transportation fuels that will meet International Marine Organization (“IMO”) standards required under international law in 2020. The restart project provided much needed economic development in the U.S.V.I. and created more than 4,000 construction jobs at its peak and more than 600 full-time jobs currently.

### **About Limetree Bay Terminals**

Limetree Bay Terminals, LLC is a world-class energy logistics hub centrally located in the Caribbean facilitating the storage, segregation, blending, and global movement of crude oils, fuel oils, bunker, gasolines, diesel, jet fuel, and liquid petroleum gases. Customers include integrated global oil majors, refiners, global trading houses, and the co-located refinery. The facility consists of 167 tanks, with a capacity of approximately 34 million barrels, and deep-water access to 11 docks including an offshore single point mooring (SPM) buoy capable of loading and discharging vessels up to VLCC size.
